

AC GAUSSMETERS - 1 AXIS

K-II EMF Meter

Very Fast Response

This genuine K-II can Measure the EMF (Electromagnetic Field) radiation strength of electrical devices in your home, workplace or school, outdoor power lines, underground lines and even when you travel and shop for appliances. Just press the button to activate the meter. Release to turn it off. Couldn't be easier.

Since EMF's are nearly everywhere it may be impossible to totally avoid them. The SAFE RANGE EMF METER from K-II can help you measure these potentially harmful fields and determine the safe range to help reduce exposure. It also helps you determine which appliances produce high level emissions.

Five brightly colored LEDs illuminate to indicate the strength of the field. Very easy to see in low light conditions. Response is instantaneous. No bouncing needle or fluctuating number digits. These features make the K-II very popular for paranormal research and ghost hunting as well. Also known as the Safe Range Meter. Single Axis. Made in USA.

- Covers the ELF range & VLF range
- 50 to 20,000Hz
- Uses one 9V battery (included)
- Accuracy of ±5% at 50-60Hz

K-II EMF Meter (Cat. #D104) ..\$59.90

ALKALINE 9V BATTERIES

Need batteries? Factory fresh, name brand, low price alkaline 9V batteries. Brand may vary. No fancy package, just fresh batteries, cheap. No limit.
