

COMBINATION METERS

MEL-KII HYBRID METER

Digital EMF, Temperature, Red Flashlight, Red Backlight & Integrated KII in One

All in One Paranormal Instrument:
EMF, Ambient Temperature,
and Red Backlight Display

- Detects EMF (Digital & LED readouts) & Cold Spots Simultaneously
- Selectable units of °F/°C
- EMF "Burst" Mode Feature for Rapid EMF Detection
- Super Bright "Red Nightview" Backlight Display with On/Off Button
- Glow in The Dark Push Buttons
- Fast Response Thermocouple Temperature Sensor
- Record Feature Captures Min & Max Values
- KII LEDs with Push On/ Push Off Switch & Sound
- Easy to read 5 Segment Mini T1 All Red LED Display
- 50 & 60 Hz operation
- Single Axis
- Accuracy of ±5% at 50-60Hz
- Instantaneous Response To EMF Fluctuations
- 9Vdc Operation

Note: The KII device will be influenced by cell phones, text message devices, RF transmitters & walkie talkie devices at certain frequencies.

MEL-K-II Hybrid (Cat. #D106) \$179.90

DIGITAL COMBINATION METER

1-Axis Electric and Magnetic Field Meter

The Digital Combination Meter boasts several distinct advantages for a meter in this price range:

- > Wide frequency response: very flat (1 dB) from 16 Hz to 2000 Hz; useful from 5 Hz to 7000 Hz
- > Tremendous Sensitivity and Range:
Magnetic: 1-2000 nT (0.01-20 mG);
Electric: 1-2000 V/m
- > Accuracy: ±2% ±20 digits at 50/60 Hz
- > Audio tone resembles a Geiger counter
- > Simple to operate, easy to read.

Perfect for home, student, or re-searcher. Uses a standard 9V battery, included. 2 yr wty.

Digital Combination Meter (Cat. #D480) \$169.99

PROFESSIONAL COMBINATION METER

Professional Quality and Versatility

This meters meets all TCO requirements for AC Electric Field and Magnetic Field measurements. Tremendous sensitivity and highly linear over 4 selectable frequency ranges which allows for determination of ELF compared to VLF readings, ultra-low frequencies down to 5 Hz, and a special filter for 16 Hz typically associated with electric trains.

Includes both an AC voltage output (to analyze frequency information or use a headset to hear the corresponding audio frequencies) and a DC output (for long term monitoring with a recording device), Geiger counter style audio output, auto power off, and integrated battery check.

	AC Magnetic	AC Electric
Range 1	0-200 nT (2 mG)	0-200 V/m
Resolution 1	0.1 nT (0.001 mG)	0.1 V/m
Range 2	0-2000 nT (20 mG)	0-2000 V/m
Resolution 2	1 nT (0.01 mG)	1 V/m
Accuracy	±2%	±2%

Frequency choices:

- 5 Hz – 100 kHz (full bandwidth)
- 16 Hz (electric trains)
- 50 Hz – 100 kHz (ELF + VLF)
- 2 kHz – 100 kHz (VLF only)

Single axis.

3½ digit LCD display.

Power consumption: 15-20 mA.

Includes 8 hour rechargeable 9V battery, AC power supply/charger, and ground cord. 2 year warranty.

Professional Combination Meter (Cat. #D482) \$695.95

ALKALINE 9V BATTERY

Need batteries? Factory fresh, name brand, low price alkaline 9V batteries. Brand may vary. No fancy package, just fresh batteries, cheap. No limit.

(Cat. #D787) \$1.95
