

# COMBINATION METERS

## ESMOG SCOUT

*Detects EMF and Flicker!*

Know anyone who is bothered by the flicker from fluorescents lights or computer monitors? eSmog Scout is a very easy way to detect both strong EMF radiation plus it gives the *frequency and strength* of light flicker.

### Simple to operate!

Set button to **flicker**: LED display indicates frequency of flicker and % of flicker relative to the light intensity.

Set button to **EMF**: Red/Green LED indicates when field is too strong, & built in speaker gives clear audio tone which corresponds to frequency and intensity of the field. 1-axis detection of AC magnetic fields from **20 to 10,000 Hz**. Touch the finger pad & your body acts as an antenna to pick up electric fields as well!

Bonus: Like a "buzz stick" Scout has a 3.5mm mono headset jack for covert listening, or connect to a DMM, oscilloscope, or spectrum analyzer for frequency and relative field strength data. Dimension: 63mm ( W ) X 118mm ( L ) X 20mm ( D ), fits nicely in the hand. Power: 9V battery, 24 month wty. CE  
**(Cat. #D101) ..... \$49.95**

## EMF HUNTER

*EMF, RF, & Temperature*

Versatile new meter for detecting cell phone radiation, power line EMF, as well as paranormal research. Combines AC magnetic field detection, microwave sensor, and temperature in a very compact design. Easy to read LED indication and dramatic sound.

For cell phones, microwave ovens, and other high frequency appliances:

**0.01 to 0.30 mW/cm<sup>2</sup>** in 10 color-coded increments:  
 - Green light (safe): Less than 0.02 mW/cm<sup>2</sup>  
 - Yellow light (caution): 0.02 to 0.1 mW/cm<sup>2</sup>  
 - Red light (warning): higher than 0.1 mW/cm<sup>2</sup>

For power lines, TVs, computers, AC alarm clocks, motors and other electric appliances:

**1 to 10 mG** in 10 color-coded increments:  
 - Green light (safe): Less than 2.5 mG.  
 - Yellow light (caution): 2.5 to 8 mG.  
 - Red light (warning): higher than 8 mG.

Temperature: External temperature probe on 6 foot cable included.

**32 - 102°F** (0-40°C) in 5 increments. Audible warning at 99°F

Power: 9V battery (not included) good for continuous use for more than 30 hours. One-year warranty. Very unique!  
**EMF Hunter (Cat. #D472) ..... \$69.95**

## RF/GAUSS FIELD METER *Both EMF Hazards for One Low Price*

Want measure both AC magnetic field and radiofrequency (microwave) radiation? Need more information than just LEDs or sound? Working on a limited budget? This unit is the first to combine these capabilities with a digital readout for under \$100! RF valid for both analog (microwave oven, AM/FM) and digital (GSM, TDMA, CDMA, PCS, Wi-Fi) signals and can distinguish between them. So easy to use, just choose RF or Magnetic, then point and read! Even includes a HOLD button to freeze the meter reading. Magnetic sensor is 1 axis, and RF is directional. **(Cat. #D438) ..... \$99.95**

### Display screen includes

- RF Signal power level in dBm
- RF Signal power density in mW/m<sup>2</sup>
- Both mG and  $\mu$ T Magnetic Field units display simultaneously
- Horizontal bar "power level display" with 12 5dBm segments
- Moving bargraph (histogram) shows changes over the last 30 readings
- 8 segment LED bar (green/yellow/red) power indication
- Backlite which can be turned on/off

Check your cell phones, computers, wiring, powerlines and just about any electrical/electronic device. Uses a 9V battery.

Mode:	RF	Magnetic
Frequency Range:	100MHz to 3.0GHz	50Hz to 15KHz useful range
Sensitivity:	1.5 $\mu$ W/m <sup>2</sup> to 0.58 W/m <sup>2</sup>	1 to 600 mG, 0.1 to 60 $\mu$ T
