## DELUXE DIGITAL MULTI-METER

*The Perfect Meter to Accompany Probes*

An amazing meter at an amazing price. Autoranging, 3½ large, easy-to-read 1 inch characters to rate DC volts and current, AC volts and current, resistance, frequency, capacitance, even Diode and Transistor tests. Includes 2 xAAA batteries, test leads, case, and instructions. Basic accuracy: 0.5%.

Most important feature: the all important 0.1 mV - 600 mV AC/DC range so it can be used with the Body Voltage Sensor, and all magnetic field probes listed.

Bonus features: Type K temperature (-22 to 572°F) and Non-contact voltage detector too!  
**Deluxe Digital Multi-Meter (Cat. #D179-2) ..... \$59.95**

## DMM with PC Interface

*Lowest Cost Voltmeter with PC Interface!*

Connects to your PC's USB port. Windows compatible software.

- Auto/Manual ranging
- High brightness back light
- Auto power off
- Data Hold

High sensitivity DMM with all the multiple functions you need including data hold, backlight, frequency, AC/DC voltage to 0.1 mV. Perfect for logging data to your PC from magnetic field and other probes. Use with all your EMF probes. Measures voltage, resistance, amperage, capacitance, frequency, even temperature!

Use it alone in the field or connect to your PC to log, save, and display data. Sample from 1 to 120 readings per minute.

Software is easy to use, nice graphics, and very intuitive. Includes K-type thermocouple, software CD, optically isolated USB cable. 4 LCD display with automatic polarity indication.

**Note: V and COM jacks are not standard 3/4 inch apart.** Use adapter for dual banana jacks.

### Ranges:

- ⊖ DC Voltage: 0.1mV ~ 1000V ±(0.5%+3 digits)
- ⊖ DC Current: 0.1µA ~ 10A ±(1.5%+3 digits)
- ⊖ AC Voltage: 0.1mV ~ 1000V ±(1.0%+3 digits)
- ⊖ AC Current: 0.1mA ~ 10A ±(1.5%+3 digits)
- ⊖ Resistance: 0.1Ω ~ 40MΩ ±(0.5%+2 digits)
- ⊖ Capacitance: 0.01nF ~ 100µF ±(3.0%+5 digits)
- ⊖ Temperature: -55°C ~ 1000°C ±(2.0%+1°C)
- ⊖ Frequency/Duty cycle: 10Hz ~ 100KHz

Includes the all important 0 - 600 mV AC range so it can be used with the Body Voltage Sensor, and all magnetic field probes listed. Also includes: • PC-Link software CD • Test leads • PC Interface wire • 9V battery • K type thermocouple • Capacitance test clip. What a value!

**DMM with PC Interface (Cat. #D417) ..... \$89.95**

## DATA LOGGING DMM WITH PC INTERFACE

*True RMS, and Very Sensitive, Store Data in the Field, Download Later*

We have found the perfect DMM to use with probes, whether used as a stand alone or connected to a PC. Because of its high sensitivity (.01mV AC or DC) it is great for detecting very small fields. For example, when used with the Magcheck 95, it will detect AC magnetic fields as small as 10 microGauss (= .01 milliGauss). Ranges all the way up to 1000V so there is no problem with over-range. Will also determine frequency from 0.001 Hz to 125 kHz, as long as the input signal is at least 300 mV. Can be used with AC/DC gaussmeter probes, RF probe, Electric field probe, body voltage probe and more. Also measures AC/DC current, Resistance, Capacitance. Software and optically isolated RS232 cable allows you to connect to your PC and log, store, plot, save and export data is included. Three year warrantee. *Plus:*

- Stores up to 43000 readings
- Min/Max and Trend displays
- View Stored data on LCD
- Temperature Probe included

**Datalogging DMM with PC Interface (Cat. #D192-D) ..... \$309.99**
