

MORE UNIQUE METERS

AIR ION COUNTER

Unique in this Price Range

This hand-held ion counter possesses the same sensitivity (down to 10 ions/cm²) as meters costing far more. Fully electrostatically shielded, with a fan throughput of 200 cm³/sec, it can make accurate readings even in adverse conditions. Measures positive and negative ions separately. Use it to measure the ions generated from electrical storms, water spray, radioactive minerals & radon, corona discharge from high tension wires, even check the effectiveness of your ion generator! Made in USA with a 1 year warranty. 9-volt battery included.

(Cat. #D156) \$499.95

Extended range version available with range of 100 - 19,990,000 ions/cm³ for high ion concentration measurements. Same price, same great features.

Air Ion Counter 20M (Cat. #D156-20M) \$499.95

Setting Time: 10 sec
 Noise level: 10 ions/cm³
 Accuracy: ±25% for fast ions
 Ion selectivity (crosstalk): 20x
 Range: 10 - 1,999,000 ions/cm³

ION STICK™

Budget Air Ion Tester

This has got to be the simplest and lowest cost way to measure Air Ions. Very easy to use and so small it's barely bigger than a finger. Especially good for testing ion generators and air purifiers which claim to produce ions.

Tiny shape with LCD panel
 Maximum reading of 1,999 counts
 Reads net + or - ions

(Cat. #D433) \$99.95

Range: 1 x 10⁴ to 1,999 x 10⁷ (ions/cm³)
 Easy to hang as a necklace or keep in hand
 Powered by LR44 button size battery
 Dimensions (L x W x H): 78 x 27 x 9mm

PORTABLE MOTION SENSOR

The Best Motion Detector For The Price!

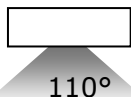

PIR technology uses infrared radiation to detect the motion of warm bodies. Beeps once when activity is detected, then 8 seconds later it produces a loud (110 dB) alarm for 60 seconds if not de-activated. 30 second delay upon activation. Low battery indicator.

The Portable Motion Sensor uses advanced technology to detect intruders and activity in a controlled area: 110° horizontal view, 20° vertical view up to 30 feet from unit. Completely self-contained and portable, the Portable Motion Sensor operates on 2 standard AA batteries. Can be mounted on a wall, floor or ceiling, or simply placed on a tabletop. Unit is armed and disarmed from up to 30 feet away with the handheld remote (included).
