

TEMPERATURE METERS

REMOTE "IR" THERMOMETER

Measure Infra-Red Heat from a Distance!

Infra-Red (IR) is a type of EMF we don't hear much about... but you know it when you feel it! This pistol grip meter (with laser pointer for pinpoint accuracy) will measure °F/°C temperatures from -40°F all the way up to 500°F (-20 to 260°C) at a safe distance. Offers an amazing 3% accuracy and a resolution of 1°F. Field of view is 6:1, emissivity fixed at 0.95. Backlit LCD read-out is easy to see, even in dim lighting. Use it to instantly measure the IR temperature of walkways, oven doors, motor housings, refrigeration coils, foods, countertops or anything that could be too hot or too cold to touch. We have been told it works great for locating cool spots in paranormal studies as well! Complete with 9V battery and auto power off to conserve battery life. CE. 3 year warranty.

(Cat. #D193) \$79.95

MINI-IR THERMOMETER

Best Value In Remote IR Thermometers

Look at what's packed into this little unit:

- 6:1 spot ratio
- 0.95 fixed emissivity
- laser pointer
- Ambient (local) temperature measurement (compare local and remote temperatures simultaneously)
- Back light, for working in dark areas
- °C/ °F display selection
- Hold function
- Over range indication: "OL" or "- OL"
- Auto power off: 20 seconds
- Low battery indication, 2 AA batteries incl.

Measurement range:

IR: -20°C ~ 270°C (-4°F ~ 518°F)

Ambient: 0°C ~ 50°C

Resolution: 1°C

And a great price too! Get one for your toolbox. **(Cat. #D415) \$49.95**

INFRA-SCAN Palm-Sized Economy

Making candy and need your ingredients to reach a certain temperature? Need to know the temperature of hard to reach or possibly dangerous surfaces? Need to know if your dog has a fever?

Infra-scan is perfect for home/office use for quick and simple temperature measurements using a technique called radiation thermometry. This allows accurate measurement of surface temperatures without contact. Small temperature changes can be easily measured. Measures temperatures from -5°F to 572°F up to ten feet away with single button operation. Reads either °F to °C with a simple double click. LCD backlight during measurement (auto off). Instructions in 4 languages. 1 year wty.

- ◆ Accuracy: ± 2%, spot ratio of 5:1
- ◆ fixed emissivity of 0.95
- ◆ Power: 4 x LR44 button cell (incl'd)
- ◆ Battery Life: over 2,000 measurements (at 10 sec each)

(Cat. #D440) \$49.95

Thermal Camera

Affordable Focus-Free InfraRed Camera

At last, a user-friendly IR camera with a reasonable cost. Weighing only 12 oz, a 4-5 hour rechargeable battery life, and amazing 2% thermal accuracy! Locate heat loss, cold spots, hot embers and more with pinpoint accuracy, all at a safe distance!

Large 2.8" color LCD display with high quality image helps you find problems faster and easier. MiniSD™ card stores up to 5000 Radiometric JPEG format images. Each image can be downloaded and analyzed on your computer using the included QuickReport™ PC Software. You can even generate professional looking reports.

- Detect defective insulation and measure home heat loss
- Check for overheating of electrical panels, wires and transformers
- Identify faults in heating and cooling systems
- Find problems with motors, fans and bearings
- Measure surface body temperature rise from exercise or cell phone use
- Perform paranormal research and more!

Temperature range is 32° to 482°F. Emissivity is adjustable from .01 to 1.0. Wide 17° by 17° field of view and able to focus as close as 2 ft from a surface. Pocket sized and fully automatic. 1 year warranty. **(Cat. #D184) \$1995.00**
