

UV METERS

UV METER CARD *Prevent Sunburn*

With the depletion of the ozone layer, the number of skin cancer and other health problems has risen dramatically, and the public is being advised to avoid prolonged exposure to the sun. But today, how much exposure is too much, and how much SPF protection is enough?

The credit card sized UV Meter Card is designed with a remarkable UV sensitive strip which changes from white to a shade of purple when exposed to UV radiation for only 20 seconds. Designed to react primarily to the wavelengths of light which are known to be the sunburn and skin damaging rays. The stronger the radiation, the darker the shade of purple. Simply compare on the adjacent color matching chart to see the corresponding "likelihood of sunburn" warning. Guidelines printed right on the meter card allow the user to determine the sun-screen SPA level required under the prevailing conditions, but this is not a high precision instrument and the readings are likely to underestimate the true UV intensity.

Take immediate measurements to ensure that you are protecting the health of your family, friends, and associates. The card will change back to its original color within minutes and can be re-used hundreds of times. Great for days at the beach, camping, boating, outdoor sports, and perfect for anyone who works outdoors. Also great for student projects.

UV Meter Card (Cat. #D198) \$3.95

Custom imprinting available on larger orders, call for details

UV/B SUNBURN METER *Digital Display of UV Index*

A user-friendly UV intensity meter which gives a lot of information. Designed specifically to measure UVB, the skin burning rays:

- ❖ UVB Index display (0-100); Time display
- ❖ Allowable time of safe exposure to the sun
- ❖ Time of sunburn protection (Alarm Beeper)
- ❖ Ambient Temperature display (°F/°C switchable)
- ❖ Operating temperature: 0 to 50 °C
- ❖ Dimensions : 67mm(L) x 45.5mm(W) x 15.7mm(H)
- ❖ Battery: 1 x Lithium CR2032
- ❖ Great for vacations, school projects, sports, outdoor work. Nice gift too!

UV/B Sunburn Meter (Cat. #D405) \$29.95

UV + THERMOMETER CARD

This UV Card Meter is an essential device for people who often goes to beach for sun bathing or outdoor activities. Indicates both temperature and UV index simultaneously anywhere, anytime, so you can take appropriate prevention measures. Perfect for **Science Fair projects** too!

- Measures current UV intensity within 3 seconds
- UV intensity range between level 1 - 8
- LCD display
- 1 x button cell (3V CR2016) included
- Compact size and as easy to carry as a credit card
- Switchable between Celsius and Fahrenheit temperature display
- Patented product , CE Certified

Practical and useful, also great as gift item. 6 mo. wty.

UV + Thermometer Card (Cat. #D406) \$14.95
