

CELLPHONE SHIELDS

SHIELDED CELLPHONE HOLSTER

Shields Your Body When You Use the Belt Clip

So you use a headset to reduce cellphone radiation to your brain. That's good. But where can you put the phone? If you keep it on your belt clip, you are irradiating *that part* of the body. This fashionable holster has built-in high performance shielding material to reflect the phone's radiation away from your hip area. Shielded only on one side, so it has no detrimental effect on the phone's performance. Attach it to your belt, pocket, purse, brief case, seat belt, etc. Fits phones up to 5" long. Perfect to accompany your hands free set.

Cellphone Holster (Cat. #D231-H) \$49.95

BOOM HEADSET

Over the Head Headset for Easy Hands-Free Conversation

Ideal for hands-free communication. Dramatically reduces microwave exposure by keeping the phone away from your head! Comfort-fit adjustable headband design. Reversible to use with either ear. Also features an adjustable boom microphone for optimum voice output, standard 2.5mm jack for use with office, home, cellular or wireless phones, and a four-foot cord. Can also be used with your tape or CD player etc. Very comfortable, especially for long term wear. Better hold. Quicker to put on than ear bud style headsets. 90 Day mfr's warranty from Panasonic. Add a ferrite bead for added protection.

Boom Headset (Cat. #D726) \$17.95

RETRO MOBILE PHONE HANDSET

All the Comfort of a Classic Telephone

Not quite hands free, but this stylish remote handset is easy to hold and offers good sound quality. Reduces your radiation exposure dramatically by increasing the distance between the phone and your head. 2.5 mm universal plug. Includes coiled cord, call pickup/end button (does not work with all phones) and adaptors for popular Motorola, Nokia, and LG phones (other adaptors may be necessary for some phones). Jet black.

(Cat. #D742) \$24.95

Headset Plug Adapter (stereo)
converts 2.5mm plug to 3.5mm plug
(U236-A) \$4.95
