

# SHIELDING PLASTIC & GLASS

## CLEAR-SHIELD™ Plastic Film

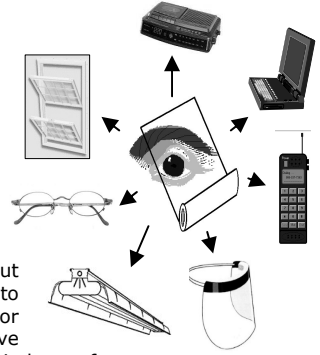

Transparent Flexible Shielding Film

Can you see radio towers outside your window?  
Want shielding you can see through?

Conductive at only 27 ohms/sq on one side, this highly conductive and flexible polyester film is Silver/Indium sputter coated for great E-field and RF shielding (20+ dB). Nearly crystal clear (greater than 80% light transmission!)

and only 5 mil thick, it is easy to cut and tape into shapes to cover computer monitor screens, microwave oven windows, car windows, fax machines, cell phones, TV remotes, alarm clocks, LED displays, eye-glasses, face shields, fish tanks and hundreds of other uses. Can help reduce sensitivity to electric fields. Will withstand up to 80°C. Without adhesive. **24 in wide.**

Clear-Shield (Cat. #D1210-24) ..... \$29.95/per lin ft  
Full roll (100 feet) (Cat. D1210-100) ..... \$2246.25 (save 25%!)

## CLEAR-SHIELD™ Plastic Film with Adhesive

Same Great Shield, with Crystal Clear Adhesive

Has clear peel-off backing which exposes adhesive. Perfect for covering computer monitors, small windows, face shields, the back of your cellphone, LED clocks, etc. **12 inch wide**, sold by the foot. Specify length.

Clear-Shield with Adhesive (Cat. D1210-A) ..... \$29.95 per linear foot  
Full roll (100 feet) (Cat. D1210-A100) ..... \$2246.25 (save 25%!)

## DataStop® Conductive Glass

Architectural Glass Providing Exceptional E-field & RF Shielding!

DATASTOP glass can be used as windows (in conjunction with shielded external walls), internal partitions or enclosures to provide very good attenuation using the "Faraday Cage Principle". Helps prevent spying into information held on computers and loss of data or other equipment malfunction due to Radar, Cell Phone or other interference, and reduces human exposure to unwanted electromagnetic radiation. The complete absence of any metal mesh and high light transmission make the product unique.

DATASTOP glass carries a 10 year warranty and requires no maintenance beyond that required for any conventional glass. Available in 3, 4, 5, and 6 mm thickness. Now available with UV, IR, and laser shielding. **All custom made, call for pricing!**

### Typical installations include:

- \* Room partitions
- \* Shielded cabinets & enclosures
- \* Monitor screen/display covers
- \* Fully screened buildings, individual floors in a building or individual rooms in a building etc.
