## ULTRA LOW EMF TELEPHONE

Great Solution for Your Home/Office Phone!

An exclusive breakthrough in telephone EMF mitigation from Less EMF Inc! A full featured desktop or wall mount corded telephone (no microwaves) combined with a special ultra low EMF headset. You get all the benefits of a normal telephone without putting yourself close to the strong magnetic fields associated with the handset, speakerphone, or phone base.

The special headset cord is about 3 feet long and uses a clear plastic tube to carry the sound to your ear. Absolutely no electronics, wires or magnets are near your head. Cord provides distance from telephone base and traditional handset, convenient mobility, and can be extended up to 9 feet with option extension cord, sold separately (see below). Tested and approved by Less EMF Inc., dramatic field reduction when the headset is used.

No special wiring or installation is required. Phone includes volume control, speed dial, redial, speakerphone and hold features. Phone can also be used in normal fashion by those not affected by EMF. Color is white, phone styles may vary. *The phone itself does not have any special shielding nor EMF reduction technology. The whole benefit is that it has the jack for the special headset.*

### Ultra Low EMF Telephone:

(Cat. #D725) ..... \$89.95

\*Headset Extension Cord (6 ft long):

(Cat. #D725-EXT) ..... \$4.95

## SHIELDED GLOVES

Faraday Cage for Fingers!

If you have (or want to prevent) ES symptoms in your hands when using a keyboard, laptop, cellphone or other electronic devices, these gloves form a conductive enclosure and effectively shield electric fields. Soft, light weight, with ribbed cuff, and offering good tactile sensitivity. Stretchy, so one size fits all, in basic gray color, each glove has a snap for a ground cord.

Fully washable and tested for 50 cycles with no appreciable loss of conductivity ( $<10^3$  Ohm/sq.). Supplied with one 10-foot coiled ground cord with snap on one end and a banana plug/alligator clip on the other end. These gloves are also used in industry for static control when working with delicate static sensitive components.

Grounding is not necessary for Faraday shielding effect, but important for static control. Try it both with / without ground cord and use whichever method works best for you. (Cat. #D240) .. \$19.95/pr

Additional Ground Cord: (Cat. #D241) ...\$7

## RFID BLOCKING WALLET

The RFID tags in identification cards have been shown to be insecure. Attackers are able to read and copy information stored on these tags to create copies they can use themselves! Major RFID enabled credit cards including Visa, MasterCard and American Express have been

hacked. This stylish RFID Blocking Wallet ensure that cards with RFID tags within the wallet can NOT be read while the wallet is closed. This gives you the ability to control when, how and by whom your cards are accessed. To allow the RFID tag in the card to be read, simply open the wallet and direct it towards the reader. Made of the finest quality leather and built to last. The wallets contain a layer of RF shielding that prevents RFID readers from reading any passive tags stored within. Has a convenient flap to allow easy "flip" access to RFID cards. Patent Pending. Block. When closed: 4.3" x 3.3"

**RFID Wallet (Cat. #D265-s) .. \$16.00**
