

PERSONAL SHIELDING

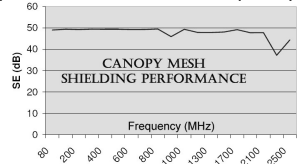

HEAVY DUTY FARADAY CANOPY

Industrial Strength for Home Use

This is not your granny's chicken wire. A truly ultra-fine metal wire mesh providing very high shielding performance is fashioned into a durable and very functional Faraday canopy for your bed, desk or other living space. Resists tearing, flaking or

loss of performance due to bending, folding or wear and tear. Tin coated 4 mil copper wire, interlock knitted with an average hole size of less than 1 millimeter provides a whopping 40 dB (99.99%) or better reduction of RF signals from 1 MHz to 2.5 GHz and beyond. Excellent low frequency electric field shielding also. Surface conductivity is 0.1 Ohm per sq. Two sizes available, both 6 feet tall so you get plenty of head room and continuous *under the mattress*. About 10 pounds overall, includes mounting hardware and ground cord.

King Size (Cat. #D208-K) ... \$895.00

Twin Size (Cat. #D208-T) ... \$595.00

CANOPY MESH FABRIC

This is the same mesh that makes our Heavy Duty Faraday Canopy. Interlock knitted for high performance, flexibility, and durability. Tin coated 4 mil copper wire, with an average hole size of less than 1 millimeter provides a whopping 40 dB (99.99%) or better reduction of RF signals from 1 MHz to 2.5 GHz and beyond. Excellent low frequency electric field shielding also. Surface conductivity is 0.1 Ohm per sq. One meter wide. Cuts easily with scissors, sew with ordinary thread. **(Cat. #D1208) \$15.95 per lin ft**

100 foot roll (Save 25%!): (Cat. #D1208-roll) \$1196.25 each

LIGHT DUTY FARADAY CANOPY

When Moderate RF Reduction Will Do

Give your body a chance to rest! Attractive and functional canopy can be used over beds or other similar sized areas to reduce radiofrequency radiation. Made from very light weight Swiss Shield Daylight fabric (100% Tergal® polyester net-knit, with 5% silver-plated copper fiber content) which stops over 99% (20dB) of incoming microwave radiation energy (at least 300-3000 MHz).

Nice veil-like appearance (plenty of air and light penetration), and has the conductive components on the inside of the threads, so no metal coating to flake *and no need for grounding!* Canopy covers the top and sides of bed. Easy to get in/out of bed and lots of head room.

Can be washed in gentle cycle, with mild detergent. Even frequent washing seems to do no harm to the shielding power of the fabric. Comes with swag hooks and an easily detachable hoop for easy mounting. Very transportable too.

Some owners say using this product to reduce RF has alleviated their symptoms associated with electrosensitivity, such as ringing in the ears, headaches/migraines, insomnia, confusion, irritability, nausea, circulation problems, etc. 2 sizes:

Light Duty Faraday Canopy King Size (Cat. #D200-K) \$999.00

Light Duty Faraday Canopy Twin Size (Cat. #D200-T) \$659.00
