

# LOW EMF DEVICES

## RF Kill Box™

*Shielding So Good That Your Phone Won't Ring*

Most cellphone shielding products are designed to reduce radiation to the user while still allowing the phone to function. This means that some radiation can still get to the phone... *and some radiation can still get out of the phone!* But sometimes you need to completely kill the signal. The RF Kill Box is a full-metal shielding jacket with very high shielding performance.

You probably know that different phones have differing signal quality... depending on your carrier, your location, and your phone model. A strong signal is harder to kill. In our tests, 99% of the phones we tested would not function when in the Kill Box under any circumstances.

The metal slip on cover is quick and easy to use and provides a good seal. Inside diameter is 95mm (3 3/4") and the height is 170 mm (6 5/8"). Large enough to hold most phones, but check your dimensions. **RF Kill Box (Cat. #R316) ..... \$18.65**

## EMP CAN™

*Versatile Shield for Both RF and Magnetic Fields*

Homeopathic remedies, credit cards and passports with chips, and electronic equipment can all be compromised by exposure to electromagnetic fields. The EMP Can™ is a great air-tight way to store these items and protect them from outside EMF influences including low grade EMP. Shields both radiofrequency *and* magnetic fields by 95% or more. All metal construction, nice wide mouth and quick-close latch keep contents secure.

In addition, you can put a radiation source (such as a mobile phone or magnet) *inside* the EMP Can to contain the field. 3.6" wide x 6.5" high. **EMP Can™ (Cat. #R339) ..... \$14.95**

## EMF CAUTION SIGNS

*Makes A Bold Statement*

Whether you have a hazardous environment at work, or you want to emphasize the dangers of EMF exposure at home or school, you can post these colorful signs in an obvious place to alert everyone about your concerns. Both are made of plastic for indoor or outdoor use.

Caution: Electromagnetic is 5x7 inches

Caution: RF Radiation is 7x10 inches

**Caution: Electromagnetic (Cat. #R602) ... \$9.95**  
**Caution: RF Radiation (Cat. #R603) ..... \$12.95**
